EDUCATION

Georgia Institute of Technology, Atlanta, Georgia

May 2025

Bachelor of Science in Computer Science (Intelligence & Media)

- Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Computer Organization & Programming, Machine Learning, Game AI

EXPERIENCE

Software Engineering Internship, Whippany, New Jersey

June 2024 - August 2024

Barclays, Markets Pre Trade: I.T. Web Portal Services

- Engineered functioning API which collects data input on a Contact Us form and stores the data in MySQL database
- Designed and developed a servlet and controller class to facilitate seamless integration between front-end form and back-end database
- Utilized Apache Maven to efficiently build and deploy the project into Adobe Experience Manager
- Configured and optimized JDBC connections to ensure reliable data transmission and storage
- Executed comprehensive testing using MS SQL Server Management Studio, ensuring data integrity and service reliability
- Apache Maven, Adobe Experience Manager, Java, JavaScript, MS SQL Server Management Studio, and MySQL

Native Android Application Development, Parsippany, New Jersey

June 2023 - August 2023

United Parcel Service, Operations Technology Team

- Developed functioning RFID Scanning Application to be used in place of barcode scanning applications currently in use for package flow by thousands of package operation centers
- Gained valuable experience in Android app development utilizing MVVM design pattern, and SQLite database
- Completed 5+ application demos, 10+ code reviews, provided feedback on pull requests of 5 team members
- Implemented new .NET MAUI Framework, transitioning from previous Xamarin framework
- Learned and implemented Agile Framework within the workplace, experienced the full SDLC
- .NET MAUI, C#, XAML

PROJECTS

ACT Driving Simulator Vertically-Integrated Research Project, Atlanta, GA

January 2024 - Present

- Developed and ran multiple python scripts on autonomous vehicle driving simulator, CARLA
- Generated 50+ vehicles to simulate traffic in various conditions
- Collected LiDAR, camera, and GNSS data from simulated sensors within CARLA environment
- Implemented path planning on ego vehicle using various search algorithms
- Implemented co-simulation with SUMO, a traffic network simulator to create a map

Dungeon Crawler Android Game Application

August 2023 - December 2023

- Developed core architecture including game loop with game optimization built in for graphics and performance
- Utilized MVVM design pattern and implemented factory, decorator, and observer design patterns in Java
- Lead a team of 5 junior year developers in Agile setting
- Created unit tests to ensure full functionality
- Moderated 15+ pull requests, reviewed code and provided feedback to team members
- Git, Java, XML

SKILLS

Programming Languages: Java, Python, Powershell, C#, C, C++, XAML, XML, JavaScript, HTML-5, CSS, SQL

Software/Frameworks: Git, .NET, .NET MAUI, Jira, BitBucket, Trello, Azure DevOps, Azure Portal, Agile Methodology, Adobe Experience Manager, Apache Maven, MySQL, MS SQL Server Management Studio, CARLA, SUMO, HTTP, Node.js, REST APIs, Microsoft Office Suite, AWS, GCP
